

Provider Workshops

In November and December we held 4 workshops for providers in Bristol, Manchester, Nottingham and London. They proved mutually useful to the providers and the Delivery Transformation Team.

The purpose of the workshops was to gather feedback on the processes we had designed (see document links below) and to inform providers of what was planned for the future of electronic working. A summary of the issues raised and how they will be taken forward by the team, will be published in the New Year.

We need to get feedback from as many providers as possible. So if you were unable to attend and would like to give individual feedback on the processes or would be interested in attending future workshops, please contact Karen Watson.
